Depending on where, when, and how energy is used, that material can be virgin, recycled, or some combination of both. The science of life cycle analysis is the clearest way to make this determination. I made this same point in a 1995 New York Times Op-Ed piece written with Dr. William Rathje. It's as relevant today as it was 25 years ago:

Industry Viewpoint: Life cycle analysis of plastic vs. paper

Life-cycle assessment or LCA (also known as life-cycle analysis) is a methodology for assessing environmental impacts associated with all the stages of the life-cycle of a commercial product, process, or service. For instance, in the case of a manufactured product, environmental impacts are assessed from raw material extraction and processing (cradle), through the product's manufacture ...

Life-cycle assessment - Wikipedia

Accounting or Accountancy is the measurement, processing, and communication of financial and non financial information about economic entities such as businesses and corporations.
