The most powerful music is music that is written in the key that corresponds to its color energy. Lending credence to this principle is the fact that colors have long been associated with individual notes, and the most common association is red with C, orange with D and so on. Other color-music correlations

Black is the lack of all colors of light, or an exhaustive combination of multiple colors of pigment that collectively suppress light. It dissipates in the natural landscape so is great for tennis court wires and fences surrounding a farm. Certainly as a coloured dye black allows a lot of people to actually look slimmer than they are.

"You Raise Me Up" - cover by COLOR MUSIC Children's Choir

Yes but tone color is a technical term and Aleazk is referring to the power of music to almost literally evoke colors to the listener. Of course, you are right, there is a reason that timbres and mixes of it are called tone color to begin with: because that's probably the largest thing that goes into something being colorful in that more abstract sense.

What is "color" in music?

Many ancient cultures believed that black was "the color of mystery and of the mysterious ways and wisdom of God," the historian Ellen Conroy wrote in her book "The Symbolism of Colors" (1921).

The idea that listening to classical music can increase your brainpower has become so popular that it's been dubbed "the Mozart effect." So how did this myth start? In the 1950s, an ear, nose and throat doctor named Albert Tomatis began the trend, claiming success using Mozart's music to help people with speech and auditory disorders.

Top 10 Myths About the Brain | HowStuffWorks

This is a partial list of common misconceptions about color management. Myth #1: Color Management is not useful in CMYK-only workflows Myth #2: There is some internal Lab/Color reference that the output of printers is compared to when profiling. Myth #3: The gamut of RGB is larger than CMYK. Myth #4: A profile is for calibration Myth #5: 5000K on a monitor is the same as 5000K in a light booth.
