If you have checked your fuses, your remote, and your door tracks and rollers, and everything looks fine, but you still have repeated problems, then you might need a new garage door opener. Garage door openers can wear down and need replacement eventually.

Common Problems With Garage Door Openers

Garage door openers are available with a chain drive, screw drive or belt drive. Chain drives (a long chain pulls the door open and closed) are the least expensive, but they're loud. Screw drives (a long threaded rod drives a mechanism that opens and closes the door) are priced in the mid-range.

Get Free Easy Roller Garage Door Opener Manual

The friction of the door rollers within the tracks is fooling the door opener into thinking the door has reached the floor, and the opener needs to be adjusted for less sensitivity. Damaged or rusted rollers can also create extra friction, fooling the door opener into stopping prematurely. Make sure the rollers are in good shape and well ...
