Tony took amazing care of his radios, but his Eton E1 XM suffered from what all of those models eventually do: a sticky chassis. Back in the day (roughly 2009 to 2013) Eton/Grundig covered a number of their radios models with a rubberized coating that unfortunately breaks down over time and becomes tacky or sticky to the touch.

Eton E1 XM Radio, Grundig Satellit 900

The Eton E1 is not an exceptional radio. I listen to Amateur Radio frequencies mostly and during the day 20 meters. My Sony 2010 which is from 1987 blows it away. My Panasonic RF-B65 equals the Sony for sensitivity but not selectivity. Its just so much smaller than the Sony. The Eton E1 disappointed me except for the XM radio.
