Mathematics in China emerged independently by the 11th century BC. The Chinese independently developed a real number system that includes significantly large and negative numbers, more than one numeral system (base 2 and base 10), algebra, geometry, number theory and trigonometry... In the Han Dynasty, the Chinese made substantial progress on finding the nth root of positive numbers and solving ...

Geometry (from the Ancient Greek: γεωμετρία; geo-"earth", -metron "measurement") is, with arithmetic, one of the oldest branches of mathematics.It is concerned with properties of space that are related with distance, shape, size, and relative position of figures. A mathematician who works in the field of geometry is called a geometer.. Until the 19th century, geometry was almost ...
