A disc brake is a type of brake that uses calipers to squeeze pairs of pads against a rotor (or "disc") in order to create friction that retards the rotation...

How to replace the rear disc brake and the brake pads Ford ...
To replace the rear disc brakes on a Ford Focus you need to purchase special tools from the dealership to retract the piston. Unlike many vehicles, you can't use a C-clamp or needle nose pliers, as it will damage the piston. The tools you need are Rear Caliper Piston Adjuster 206-010 and Adapter 206-026. After you get the tools, read further to ...

OEM Ford Brake Pads | OEM Ford Parts
OTC brake pad gauge (click image to buy) The materials used to construct brake pads include steel backing plates, shims, friction materials, rubberized coatings, and thermal insulation coatings. These are strong materials, but they are not strong enough to last forever. There will come a time when your brake pads will need to be replaced.

When to Replace Brake Pads (Minimum Brake Pad Thickness)
The brake pads on your Ford Focus have a metal backing plate with friction material on the front used to stop your vehicle. When the calipers receive hydraulic pressure from the brake master cylinder, they compress the brake pads, pressing them against the brake rotors, and the resulting friction helps slow your Focus.

Brake Pads - 2014 Ford Focus | O'Reilly Auto Parts
The steps in this guide are used to replace the brake pads on all Focus models in the 2005-2007 generation, except for the ST model, which has slightly different brakes. Caution should be exercised when working with brake and suspension components, and proper safety goggles should be worn at all times.
