DATABASE SYSTEMS Exercise 1.1 Why would you choose a database system instead of simply storing data in operating system files? When would it make sense not to use a database system?  
Answer 1.1 A database is an integrated collection of data, usually so large that it has to be stored on secondary storage devices such as disks or tapes. This data can

## **DATABASE MANAGEMENT SYSTEMS SOLUTIONS MANUAL**

The table is the basic data-storage unit in a relational database. Tables consist of columns and rows. Tables consist of columns and rows. The columns are the attributes or qualities that we want to express, while the rows hold the actual data, with one (or no) items per row.
