## **Deposition**

The Erosion, Deposition, and Prevention lesson provides students opportunity to develop an understanding of the effects of erosion on land over a period of time. Students take part in carrying out an investigation using a land model to simulate water eroding land away.

## **LESSON 1 Weathering, Erosion, and Deposition**

Wind and water move dirt, rocks, and other materials (erosion) and drop them off in different locations (deposition). All of these little movements lead to big changes to the surface of the earth.

and erosion work together to wear down and carry away rocks on Earth's surface.

- Erosion is the process of transporting to a new location.
  - Agents of erosion include:
  - water.
  - ice and glaciers.
  - wind.
  - animals, including .
- Deposition  
Deposition is the process of sediment being added to a new location. •

## **Science - Chapter 6, Erosion and Deposition - Lesson 1 ...**

Erosion produces landform that are often tall and jagged with cuts in layers of rock, and deposition usually produces landforms that are flat and low-lying.

What can erosion do to landforms?

Landforms formed by erosion can

# Read Book Lesson 1 Erosion And Deposition Answer Key

expose several layers of rock.

Sometimes, only some rocks erode on a landform and leave more erosion-resistant rocks behind.
