The human relations theory, also known as neo-classical theory, states that while designing an organisation structure, the people who are employed there and their behaviour should be taken into consideration. No manager can think solely of job descriptions, he has also to think of why people behave as they do and what influences their behaviour.

## **Organizational Designs and Structures - Principles of ...**

Traditional organizational theory was developed at the late 19th century and was taken from a bureaucratic-style structure, where there was one bureaucratic head managing over many bureaucracies. In this theory, the head of the organization is in the central authoritative role and below him are all the various managers he presides over.

## **Theories of Organizational Structure | Bizfluent**

In simpler terms, "Organizational Design" refers to defining, designing, and re-structuring organizational structure. The very process of organizational design is aimed at finding any type of defective or dysfunctional elements related to an organization's system, organization structure, process, and work culture.

Five Approaches to Organizational Design. Managers must make choices about how to group people together to perform their work. Five common approaches — functional, divisional, matrix, team, and networking—help managers determine departmental groupings (grouping of positions into departments). The five structures are basic organizational structures, which are then adapted to an organization's needs.

## **Five Approaches to Organizational Design**

Types of Organizational Designs. Organizational designs fall into two categories, traditional and contemporary. Traditional designs include simple structure, functional structure, and divisional structure. Contemporary designs would include team structure, matrix structure, project structure, boundaryless organization, and the learning organization.
