Pathobiology of the  
Aging Mouse (2 Volume  
Set) 1st Edition by U.  
Mohr (Author) ISBN-13:  
978-0944398562.

ISBN-10: 0944398561.

Why is ISBN important?

ISBN. This bar-code  
number lets you verify  
that you're getting  
exactly the right  
version or edition of a  
book. The 13-digit and  
10-digit formats both  
work.

The laboratory mouse, as an aging animal model, provides numerous advantages such as short lifespan, low price point, large sample size, and ease of environmental and genetic control. While mice develop an array of age-related diseases and lesions, there are variable differences from several common human age-related disease conditions.

The plan involves pathological assessment of tissues and organs from strains of old mice, by independent pathology groups in a concurrent manner in order to characterize the changes in lesion incidence and severity in response to anti-aging drugs at specific time points. This approach allows for connection with
