Running Record Documentation Example

For example, when the engine observes the data (12:14, dog), it sets the watermark for the next trigger as 12:04. This watermark lets the engine maintain intermediate state for additional 10 minutes to allow late data to be counted. For example, the data (12:09, cat) is out of

Running Record order and late, and it falls in windows 12:00 - 12:10 and 12:05 - 12:15.

Structured Streaming Programming Guide - Spark 3.0.1 ...

If a record is larger than the record size you've set, you'll get the record back in pieces. Trying to set the record size to zero or less is deprecated and will cause $/ to

have the value of "undef", which will cause reading in the (rest of the) whole file. As of 5.19.9 setting $/ to any other form of reference will throw a fatal exception.

perlvar - Perl predefined variables - Perldoc Browser

Once you're set up to record test runs, we automatically generate a Record Key for the project. A record key is

a GUID that looks like this f4466038-70c2-46 88-9ed9-106bf013cd73 You can create multiple Record Keys for a project, or delete existing ones from our Dashboard. You can also find your Record Key inside of the Settings tab in the Test
