Authorama offers a good selection of free books from a variety of authors, both current and classic.

Searching For The Oldest Stars

"Searching for the Oldest Star" - Anna Frebel (science - astronomy - 0675 - January 18, 2016) "In astronomy it is often of great importance to describe as many fact and characteristics of the cosmos in the simplest possible fashion. After all the Universe is complicated enough as it is." From the text p55

Searching for the Oldest Stars: Ancient Relics from the ...

In the same way that archaeologists search for relics of earlier civilizations and epochs, stellar archaeology explores the early cosmos by means of old stars. Of course it is not a matter of digging in the dust or dirt somewhere in a desert under the blazing sun but instead searching the night sky for stars dating to the time shortly after the ...

Searching for the Oldest Stars: Ancient Relics from the ...

Here, Anna Frebel—who is credited with discovering several of the oldest and most primitive stars using the world's largest telescopes—takes readers into the far-flung depths of space and time to provide a gripping firsthand account of the cutting-edge science of stellar archaeology.

Rock star astronomer is searching for the oldest stars

Here, Searching For The Oldest Stars shines. Frebel deals with the evolution of scientific thinking on the nature of the universe, the formation of ideas on how to identify such stars, and the wearisome but hopeful search for individual examples, with real descriptive power....

Searching for the Oldest Stars - Walter de Gruyter

The age of the oldest known stars approaches the age of the universe, about 13.8 billion years. These are recognized as among the oldest: Some of these are among the first stars from reionization (the stellar dawn), ending the Dark Ages (cosmology) about 370,000 years after Big Bang.

List of oldest stars - Wikipedia

In a new book published this month, "Searching for the Oldest Stars: Ancient Relics from the Early Universe," Frebel chronicles the often-sleepless hunt for stellar artifacts. She spoke with MIT News about the sometimes-risky life of an astronomer, and how light from ancient stars may give new understanding to our modern world.

3 Questions: Anna Frebel on searching for the oldest stars ...

Astronomers study the oldest observable stars in the universe in much the same way archaeologists study ancient artifacts on Earth. Anna Frebel takes readers into the far-flung depths of space and time to provide a gripping firsthand account of the cutting-edge science of stellar archaeology.

Searching for the Oldest Stars on Apple Books

close. Take a walk on a moonless night. Watch the Milky Way above, made from a myriad of stars. Did you know that some of them have been shining for more than 13 billion years? These are the oldest, still surviving, objects in our 13.8 billion years old universe. "Stellar archaeology" identifies these extremely rare relics.

Searching for the oldest stars - ANU

A unique aspect of Searching for the Oldest Stars is that each chapter is intended to stand alone, so the chapters need not be read in any particular order. Some chapters outline the detailed physical processes by which stars form and evolve. Others tell enthralling stories, such as the author's account of the Australian bushfires that destroyed the Mount Stromlo Observatory in 2003 or her description of what it is like to spend weeks on end on a remote mountaintop observing the night skies.
