Play therapy can be nondirective, as in the case of allowing a client to play with sand to relieve stress, or directive, as in the case of having a client tell a story about a family using puppets to learn more about the client's family dynamics. Play therapy can also be adapted to the client, as very young children play in different ways ...

Acceptance and Commitment Therapy (ACT) encourages people to embrace their thoughts and feelings rather than fighting or feeling guilty for them. It may seem confusing at first, but ACT paired with mindfulness-based therapy offers clinically effective treatment. After all: Running away from any problem only increases the distance from the solution.

For many years, the process of the nucleation and growth of nanoparticles have been described through the LaMer burst nucleation and following Ostwald ripening to describe the change in the particles size. This process was originally modeled by Reiss with an accepted model being developed by Lifshitz-Slyozov-Wagner, LSW theory. This was considered to be the only theory of nucleation until ...

Hypothyroidism is a common condition of thyroid hormone deficiency, which is readily diagnosed and managed but potentially fatal in severe cases if untreated. The definition of hypothyroidism is based on statistical reference ranges of the relevant biochemical parameters and is increasingly a matter of debate. Clinical manifestations of hypothyroidism range from life threatening to no signs or ...

Cluntun et al. identify the pyruvate-lactate axis as a critical node in cardiac homeostasis and health. This axis is maintained by a careful regulation of the disposition of pyruvate, including mitochondrial import and cellular export as lactate. During hypertrophy and heart failure, this balance is disrupted. Regaining this balance by inhibiting MCT4 ameliorated the hypertrophic phenotype.

The role of the counsellor is to enable the client to explore many aspects of their life and feelings, by talking openly and freely. Talking in such a way it is rarely possible with family or friends, who are likely to be emotionally involved and have opinions and biases that may be detrimental to the success of the counselling.
