Echocardiogram: What It Shows, Purpose, Types, and Results

Research has found a strong correlation between your RPE ratings and your actual heart rate during exercise. For instance, a hard interval run should be RPE 9-10 or 94 to 99 percent of your maximum heart rate. On the other hands, an easy recovery should be RPE 3-4, which corresponds to roughly 60 to 70 percent of maximum heart rate.
