Against The Grain A Deep

Against the Grain: A Deep History of the Earliest States by James C. Scott tells a somewhat different story that will challenge everything you've been taught about ancient history. For example, by about 10,000 BCE, small human communities had begun to form, domesticating plants and animals, irrigating crops, and growing some of their own food ...

around any large quantity of grain, even freestanding piles outdoors.

Grain entrapment - Wikipedia

Lithium-ion suffers from stress when exposed to heat, so does keeping a cell at a high charge voltage. A battery dwelling above 30°C (86°F) is considered elevated temperature and for most Li-ion a voltage above 4.10V/cell is deemed as high voltage. Exposing the battery to high temperature and dwelling in a full state-of-charge for an extended time can be more stressful than cycling.
