Breast Pathology: A Volume in the Series: Foundations in ...

The adult female breast consists of a series of branching ducts that terminate in lobules. The arrangement of these structures resembles a branching tree with 5–10 primary milk ducts in the nipple, 20–40 segmental ducts, and 10–100 subsegmental ducts that end in glandular units called terminal-duct lobular units (TDLU) (Figure 17-1) .

BREAST PATHOLOGY EXPERT CONSULT ONLINE AND PRINT 1E [EBOOK]

Histopathological grading diagnosis of ductal carcinoma in situ (DCIS) of the breast may be very difficult even for experts, and it is important for therapeutic decisions. The challenge may be due to the inaccurate and/or subjective application of the diagnosis criteria. The aim of this study was to investigate the intra-observer agreement between a traditional method and a developed web-based ...
