Engine Speed Sensor Location On

by Thomas West. The vehicle speed sensor (VSS) on your Ford vehicle is an electronic device that measures your vehicle's speed. This information is sent to the electronic computer module (ECM), where it is shared with other vehicle systems that depend on this data. The function of several of your vehicle's systems depend on data from the VSS and ECM, such as variable speed power steering, cruise control, anti-lock brakes and your speedometer.
