For partial coherence the contrast is decreased. A laser oscillating in a single transversal mode, e.g., TEM₀₀, is completely spatially coherent. A transversal multimode laser has a low spatial coherence Holography: A Practical Approach.

Holography A Practical Approach G - PDF Free Download

Holography is the science and practice of making holograms. A hologram is a photographic recording of a light field, rather than an image formed by a lens. The holographic medium, for example the object produced by a holographic process (which may be referred to as a hologram) is usually unintelligible when viewed under diffuse ambient light.

Holography - Wikipedia

Holographic displays must generate a visible image indirectly through interference patterns of a reference wave at some distance in front of the SLM—and when using a phase-only SLM, there is yet another layer of indirection added to the computation.
